

Master's Degrees in Science

Graduate Students Enrolled in Science by Sex

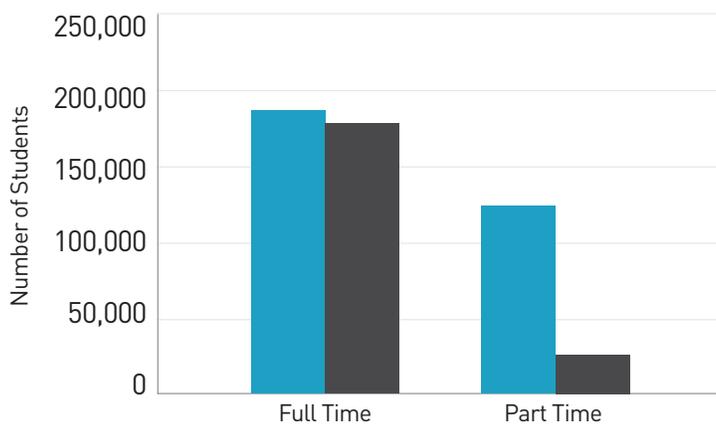

Master's Doctoral

Ratio of 2021 Master's Students to Doctoral Students in Science by Ethnicity and Race

Science Students by Enrollment Intensity in 2021

In the sciences, master's students have greater representation of students who identify as female and ethnic or racial minorities than doctoral students.

Overall, there are more master's students than doctoral students, largely accounted for by the five-fold increase in part time master's students.

Data for other race, more than one race, and unknown ethnicity and race not shown. Calculations from 2023 Women, Minorities, and Persons with Disabilities table 2-3. National Science Foundation 2021 Survey of Graduate Students and Postdoctorates in Science and Engineering tables 1-4b and 4-3.
